

Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

The U.S.D.A. has a responsibility to ensure the safety of our food supply, and to let the public know what they are eating. Please label this food, or take it out of our cafeterias!

Sincerely,

Jacquelyn Cole

The USDA has once again CAVED-IN to Corporate Profit over consumer health & needs. The Public does NOT WANT This only large meat packers so they can cut corners & make more \$ at our expense!

Sincerely,
